

NORDIC KRAFT

Environmental policy

Aware of its environmental and social responsibilities, Nordic Kraft is committed to protect the environment and to continually improve the environmental performance of the activities under its responsibility in a context of sustainable development.

The corporative guidelines for implementing this policy are as follows:

- Comply with all regulatory requirements applicable to its environmental aspects.
- Measure its greenhouse gas emissions and monitor its environmental discharge (water, air, waste) to assess its impact on the environment.
- Partner with major raw material suppliers and subcontractors who comply with environmental regulatory requirements.
- Use resources in a sustainable way.
- Train employees and subcontractors to their role as individuals, on the impacts of their activities on the environment.
- Set targets and objectives for environmental aspects and monitor them in a continuous improvement approach.
- Conduct regular environmental compliance audits to verify that management and operating practices comply with regulatory requirements.
- Identify and evaluate potential risks to the environment and take action to prevent, control or eliminate these risks.
- Communicate this policy to its employees, suppliers and subcontractors and make it available to the public.
